

Dresser AMR Adapter for the Series B3 CTR/TC Meter

Figure 1 - AMR Adapters for Dresser Series B3 Meter

Dresser Utility Solution's residential AMR Adapter for the Series 3 CTR/TC index units allows you to mount an Itron® Residential ERT® 40G for Invensys or American Meters directly onto a Dresser Series B3 Rotary Meter. Additionally, the Adapter facilitates the mounting of a Cellnet Module directly to the end of a Dresser Rotary Meter.

The design utilizes a Series 3 Lexan® cover with an opening to engage the ERT or Cellnet module in a direct drive link to the gear reduction unit. Our proven ID seal system between the adapter and the Series 3 cover provides a barrier against moisture intrusion into the oil free cover. The AMR Adapter is fastened to the Series 3 cover from the inside providing a tamper proof design. Slip flange and mounting screws are not included.

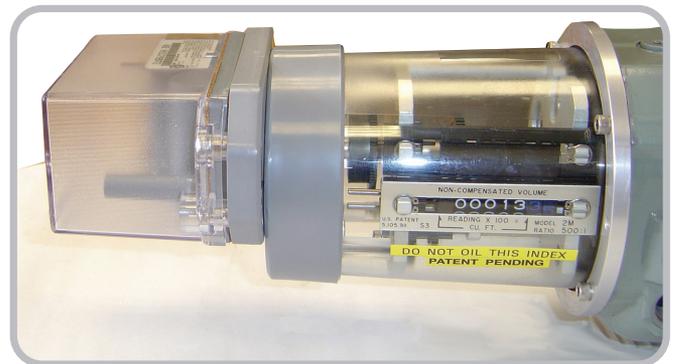

Figure 2 - AMR Adapter and ERT installed on a Dresser Meter (top inlet meter installation shown)

Our new direct drive AMR Adapter offers you a low cost solution for Series B3 CTR or TC meters in applications that require the adaptation of a Residential ERT or Cellnet AMR. You will also benefit from ease of use with this design compared to the currently available solutions for Instrument Drive and Solid State Pulser version meters that connect to AMR devices.

The AMR Adapter is available as a conversion kit for field installation or factory installed on new meters.

Lexan is a registered trademark of Sabic Global Technologies B.V. Itron and ERT are registered trademarks of Itron, Inc.
