

**Dresser Utility Solutions** is a leading provider of measurement, electronics, instrumentation, flow control, distribution repair products, and over pressure protection devices to utility and industrial customers.

For more than a century, Dresser Utility Solutions has been a major worldwide manufacturer and marketer of highly engineered products for critical infrastructure in the global utility and industrial sectors. Dresser Utility Solutions core business has

been serving gas utilities, and going forward will focus on serving the broader Utility sector, particularly in the water and wastewater treatment segments.

The aging gas and water utility asset base and heightened focus on ESG necessitate innovative solutions and products, which Dresser Utility Solutions is uniquely positioned to provide.

**Dresser Measurement** offers accuracy, dependability, and low maintenance in custody transfer measurement applications. The time-proven Dresser meter is the preferred rotary positive displacement gas meter in distribution, transmission and production segments for accurate measurement from the well to the burner.

**Dresser Pipeline Solutions** provides design and advances in pipe joining repair and pressure control technology with an unmatched variety of pipe joining, repair and pressure control solutions for the energy and transmission industries.

**Dresser Utility Solutions UK** is dedicated to providing the best engineered solution for the design, development and manufacture of gas measurement and control products, distribution and transmission systems; and metering, pressure reduction and high pressure skid solutions.

**Flow Safe** manufactures spring-operated and pilot-operated high performance over pressure protection devices focused on applications in Natural Gas Distribution, Pipeline, Aerospace, Marine, Industrial Gases and other liquid and gas process applications.

**ANDCO** linear actuators are self-contained, electro-mechanical actuators designed for precise positioning and automation of material handling or flow control equipment.

**RCS** offers a comprehensive line of quarter-turn, multi-turn, and the industry leading SurePowr series of spring-return electric actuators designed to address the most severe and demanding service requirements.

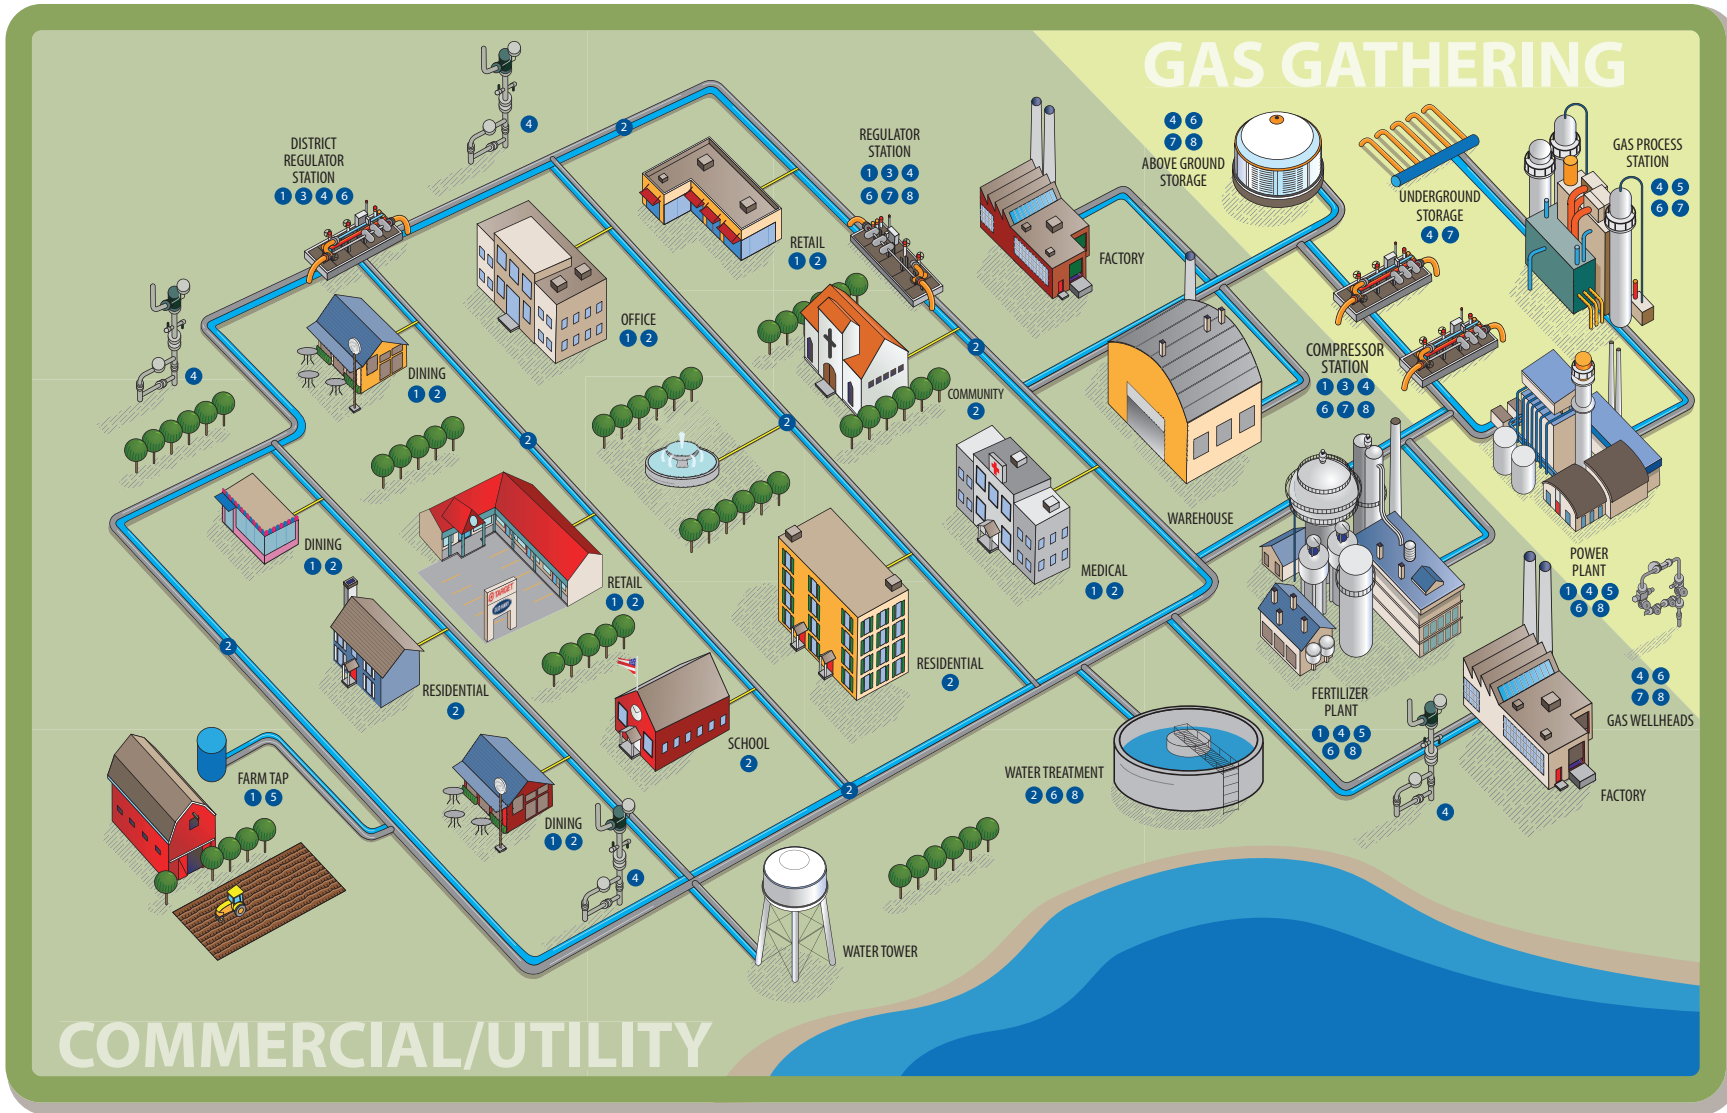

**Texsteam Pumps** offer a broad range of pneumatic, electric and solar powered pump solutions to keep a pipeline flowing or neutralize substances in natural gas to improve well production.

**Nibisco** selects, sizes and builds automated valves and provides solutions to many different kinds of automatic applications in the Oil & Gas, Water and Waste Water, Chemical Plants and Compressor Stations.
